

Aluminum Honeycomb Panel

Aluminum Honeycomb Panel

Aluminum honeycomb panel holds a high strength and rigidity, and sound fire-proof and heat-isolation capabilities, so it's widely used in decorating areas around the world such as buildings out-walls, purdah wallboards, billboards, and purify dust-proof projects and so on. The aluminum honeycomb panels which we make all passed relatively international quality standards.

Features of Aluminum Honeycomb Panel:

Lacquer coating: 70% fluorocarbon painting in the surface, with better weather-resistance and self-cleaning capabilities

Better temperature adaptability: kaipujin AHPS could be used from -40 to +80 , for special requirement temperature could reach 100

Environment-friendly and could be totally recycled.

Range Application of Aluminum Honeycomb Panel:

1. Construction industry

Curtain wall and hanging board

Interior partition and show case

Ocean project

Interior design project

Roofing materials

2. Transportation industry

Commercial vehicle body

Building on ship

Motor trolley

Bus

3. Others

Elevator

Containers

Sizes and Colors of Aluminum Honeycomb Panel:

Length \leq 5000mm

Width \leq 1500mm

Thickness: 6mm, 8mm, 10mm, 12mm, 15mm, 20mm, 25mm...200mm
