

Fireproof Aluminum Composite Panel

Fireproof Aluminum Composite Panel

Fireproof aluminum composite panel is coated with polyester resin or PVDF, so it can easily adapt to different environments no matter hot or cold. This aluminum composite panel has super anti-weathering and fire-resistance capacities and passed ISO9001:2000 quality management system certificate

Standard Specifications of Fireproof Aluminum Composite Panel:

- 1) Thickness: 3mm, 4mm, 5mm
- 2) Width: 1,220mm; 1,250mm; 1,575mm
- 3) Length: 2,440mm; 3,050mm; 3,200mm or according to your requirement)
- 4) Aluminum foil thickness: 0.50mm, 0.40mm, 0.30mm, and 0.20mm, 0.15mm

Structure of Fireproof Aluminum Composite Panel:

- 1) Front side: aluminum coated with polyester resin or PVDF coating
- 2) Core: nontoxic polyethylene / non combustible material
- 3) Back side: aluminum with / without polyester coating

Features of Aluminum Composite Panel:

- 1) Super peeling strength
- 2) Good temperature adaptability
- 3) Excellent performance of fireproof
- 4) Weather proof

Warranty:

15 years for PE coating ACP
20 years for PVDF coating ACP

Application of Fireproof Aluminum Composite Panel:

Building exterior wall, curtain wall board, airport, railway station, balcony, equipment unit, indoor compartment, billboard, identification board etc.

Advantages for you to trade with my company

- 1) Competitive price
- 2) Big supply ability
- 3) Superior quality
- 4) Small orders accepted
- 5) OEM available
- 6) Quality guarantee

Certification:

ISO9001: 2000
