

PVDF Aluminum Composite Panel

PVDF Aluminum Composite Panel

PVDF aluminum composite panel is coated with PVDF that has a strong aging resistance and ultraviolet radiation resistance capacities, furthermore, this aluminum composite panel is light, easy to install and maintain so it is suitable for outdoor environments such as airport construction, ad boards, home appliances that need to resist heat, isolate noise and proof shock, sunshades, bathrooms, washing rooms and simple walls and so on. This PVDF aluminum composite panel we make in China has been strictly inspected for a better quality.

Features of PVDF Aluminum Composite Panel:

Panel thickness: 3 to 6mm.

Width: 1,000, 1,220, 1,250, 1,270, 1,500, 1,550mm.

Length: 2,440mm or customized length.

Paint: PVDF coating/polyester coating, with back coating.

Core: normal PE core (black), fire-resistant PE core (fire class B1)

Light weight, excellent rigidity, good impacting resistance, easy installation, Processing and maintenance capabilities.

Excellent self-cleaning capacity.

Different skin, aluminum thickness and colors are all available.
