

# Stone Color Aluminum Composite Panel

## Stone Color Aluminum Composite Panel

Stone color aluminum composite panel is coated with painting aluminum through chemical treatment and keeps polyethylene as core materials, furthermore it's also a composite material manufactured by equipments that are specially used for manufacturing aluminum composite panels. Stone color aluminum composite panel we manufactured has a beautiful and elegant exterior, good press-resistance abilities and this aluminum composite panel is easy to install and maintain.

### **Features of Stone Color Aluminum Composite Panel:**

Coating: PVDF or polyester

Lightweight, flat surface and high strength

Excellent rigidity and good impact resistance

Excellent heat and sound insulation

Fire-resistant, acid-resistant, alkali-resistant, weather-resistant and non-resonant

Easy-to-install

Easy processing and maintenance

Bright, elegant and magnificent

Available in various designs

Hylar 5000 PVDF resin features strong chemical-resistant

Unique colors can be easily maintained

### **Specification of Stone Color Aluminum Composite Panel:**

Thickness: 3 to 6mm

Aluminum sheet thickness: 0.1, 0.12, 0.15, 0.18, 0.2, 0.3, 0.4, 0.45 and 0.5mm

Width: 1,220, 1,250, 1,270, 1,500, 1,550 and 1,570mm

Length: 2,440mm and customized length within 5,000mm

Standard size: 1,220 x 2,440mm (nonstandard sizes available according to requirements)

Weight: 5.6kg/m<sup>2</sup> based on 4mm thick

### **Quality standards:**

This stone color aluminum composite panels we make in China also comply with GB/T 17748-1999 and SGS

KV-07-04992X standards
